End Of Life Announcement, TRACO POWER ESP Series

A variety of internal key components in TRACO POWER ESP Series (legacy encased AC/DC power supply family introduced 2002) have become difficult to source for material buyers, causing unpredictable production lead time and long delays on back orders.

In consequence, TRACO is forced to declare the discontinuation of ESP Series.

Factory production orders for ESP Series are accepted until end of March 2016. Accordingly, customers are requested to place their Last Buy Orders to TRACO or TRACO POWER Distributors within Friday March 11th 2016.

Affected customers may perform replacement evaluations on following TRACO POWER Product Series: TXM; TXL; TXH; TOP(-C); TPP or products with different form factor.

Please note: before replacing a product model by another, adequate tests have to be performed to ensure the full compatibility of the new model in customers application. The customer alone is responsible for the approval of the replacement model.

We thank you for your understanding and apologize for any inconveniences caused.

Best regards,

Traco Electronic AG
